

Haribo

SWEETS manufacturer Haribo set up in Britain in 1972 when it bought Dunhills, which manufactured traditional sweets including Pontefract Cakes. Haribo, which was founded in Bonn, Germany, by Hans Riegel Sr in 1920, now employs around 500 people at the Pontefract factory on Front Street. Headed by managing director Herwig Vennekens, Haribo produces around 650 tonnes of sweets a week. Last year, the company reported strong growth with sales up 19 per cent and total revenue increasing to £113m. w7090a147

More space let at Calder Park

PROPERTY developers Gladman Developments have welcomed their latest tenant to Mariner Court, Wakefield, following the letting of 3,240sq ft of office space to Lenstec.

Paul Roberts of Gladman Developments, said: "We are delighted to have secured Lenstec as our latest occupier on Mariner Court.

"This letting reflects the quality of space we have created combined with the competitive terms we can offer prospective occupiers."

Mariner Court, located on Calder Park just off junction 39 of the M1, will eventually provide over 58,000sq ft of Grade A air-conditioned office space within a range of unit individual sizes from as little as 1,000 sq ft.

More than 40,000sq ft has already been speculatively built by Gladman, with the scheme attracting a range of current occupiers including United Business Centres, Aqua Mist Fire Protection and Diagnostic Health Solutions.

Robin Beagley of letting agents WSB said: "The level of interest we have seen at Mariner Court is very encouraging and the latest letting to Lenstec is testament to the quality and flexibility of the office space that appeals to a wide range of occupiers."

He continued: "The success we have had at Mariner Court and the positive level of enquiries the scheme has generated over the past year reflects the fact that we are starting to see signs of improve-

ment in business sentiment in the Wakefield area."

Set in a prominent position on Calder Park, the development provides 15 high-quality self contained office buildings. The well-specified scheme includes raised access floors, air conditioning and dedicated on site car parking.

Fibre optic cabling has been installed to each unit, offering occupiers 100Mbps broadband connectivity on very competitive terms.

2,000 sq ft unit available
